al t	2.	(amended) Apparatus as defined in claim 1 further including an auxiliary surface
<b></b>		associated therewith.
92	7.	(amended) Apparatus as defined in claim 1 wherein said expandable member is selected
		from the class consisting of bellows and scissors mechanisms.
	8.	(amended) Apparatus as defined in claim 7 wherein said expandable member is adhered
		to said platform.
a3	11.	(amended) The method of supporting a body part for transfer, comprising the steps of:
•		(a) positioning said body part on a rest member;
		(b) expanding said rest member to an inclined elevation with said body
		part supported thereon; and
		(c) transferring said body part from said rest member.
	12.	(amended) The method of claim 11 further including the step of expanding said rest
		member in association with a bed.
a4	16.	(amended) The method of fabricating apparatus for supporting a body part comprising
		the steps of:
		(a) providing a pivotal platform configured to said body part; and
		(b) associating an expandable member with said platform.
a5	19.	(amended) The method of claim 18 further including the step of providing a valve for
·		inflating said bellows.
aþ	21.	(amended) A system for assisting a person having a lower limb into adopting a reclined
		position from a sitting position, comprising a surface upon which a person is to recline;
		and means for transferring the person to said surface, comprising means for elevating said
		lower limb of said person to a level permitting the transfer of said person to said surface
		with said lower limb in a reclined position.
an	31.	(amended) A method for assisting seated persons into adopting a reclined position on an
		elevated surface comprising the steps of:
		(a) Positioning a seated person's lower limb on means for elevating said
		lower limb;
		(b) Elevating said lower limb with said person remaining seated; and
		(c) Transferring said elevated lower limb to an elevated surface.
as	35.	(amended) A method as defined in claim 34 wherein said lower limb is transferred to
•		said elevated surface such that said person can adopt a reclined position.
